Logging, Inc.

Vision

ILI's vision is to be the preferred global provider of formation and drilling evaluation services, with the best-in-class reputation for helping our clients meet their objectives.

We will be an indispensable partner to our clients by minimizing both geological and drilling risk and reducing costs.

We will continue developing innovative and relevant technologies, together with the necessary employee skills and competencies to deliver exceptional value to our clients.

Mission Statement

ILI's mission is to provide measurable value to our clients, helping them not only to monitor the drilling process, but also manage geological and drilling risk.

By investing in people, training, and innovative technologies, we will optimize the geologist's role at the wellsite, whilst offering practical solutions to reduce costs, improve QHSE performance, and maximize efficiency.

Quality, Health, Safety & Environmental Mission Statement

To create a corporate culture of pro-active QHS&E awareness resulting in no harm or loss to people, property, processes or the environment.

This will be achieved by developing and implementing an effective QHS&E management system that ensures continuous improvement against ILI targets and objectives.
